Website

I work to create formal but practical techniques and methods for engineering software. To do this, I draw from disciplines such as
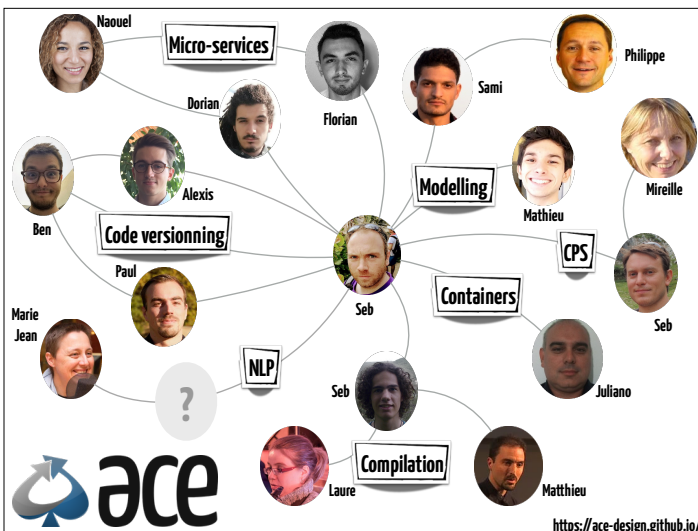

Open Questions

How to make students more visible?

Is the google group convenient?

LATECE UQÀM

- Modeling, validation, and implementation of business processes
- Intelligent business processes – models, infrastructures, and applications
- Data mining – algorithms, tools, applications, and issues
- Asset management and software quality
- Cloud computing – models, tools, languages, and design patterns
- Informatique et société
